

METHODS, SYSTEMS AND COMPUTER PROGRAM PRODUCTS FOR  
ACCESSING DESCRIPTIVE INFORMATION ASSOCIATED WITH A  
TDMA/GSM SWITCH

5

ABSTRACT OF THE DISCLOSURE

Accessing descriptive information associated with a TDMA/GSM switch having an adjunct processor is provided. At least a portion of a database of descriptive information is incorporated with data provided to the adjunct processor to control the TDMA/GSM switch. The adjunct processor is accessed to access the TDMA/GSM switch and to access the portion of the database of descriptive information incorporated with the data provided to the adjunct processor. The portion of the database incorporated with the data provided to the adjunct processor may be selected based on the data provided to the adjunct processor to control the TDMA/GSM switch.
